#### POLITICAL ECONOMY OF PUBLIC BANKS

ELECTORAL EFFECTS OF SAVINGS BANKS IN GERMAN SUBNATIONAL ELECTIONS

Jonas Markgraf & Malte Berneaud-Kötz

Hertie School of Governance 02 May 2016

# BACKGROUND

#### **MOTIVATION**

- financial crisis 2007-8: increased interest in bank-politics interface
- politicians' participation in public banks understudied
- public banks are central element of Europe's banking sector

### Institutional Setting

- large number of public savings banks (Sparkassen) in Germany
- Sparkassen important providers of credit and public goods
- regional outlook of savings banks & close ties to local politics

#### SPARKASSEN BUSINESS AREAS

the image?

# any idea how to center

# Hypothesis

#### Hypothesis

 mayors with board seat in savings bank extract political rents from board membership

#### Hypothesis:

Mayors with a board seat in a Sparkasse are more likely to be re-elected than mayors without a boardseat, holding all other explanatory variables constant.

#### STORYLINE

How does membership in a Sparkasse affect electoral success?

- direct channel: influence on strategic decisions of bank
  - credit volume
  - timing of consolidation and mergers
  - donations & payouts
- indirect channel: competence signal to constituency
